2. ROPEWAYS INSTALLATIONS

Our activities in the field of infrastructure cover electro-automation of ropeways and cableways, such as aerial and surface lifts for transport of skiers and persons. Such projects demand the highest degree of reliability and security in most demanding climate conditions. Siemens PLC controllers and extreme climate conditions security modules provide process control, while Siemens DC regulators provide the main motor-drive in bigger and Siemens AC regulators in smaller installations. In the field of cableways, we also provide automation of snowmaking systems and remote control and access.
